A FILM
YOU MUST
SEE!

Perhaps only once in a lifetime does a vehicle of communications come along of such magnitude to warrant our unqualified recommendation to the profession. The Swissedent Foundation's sound slidefilm in color—presenting in detail the complete Swissedent concept—is just such a vehicle.

We assure you that this film program can be of utmost importance to increasing your practice. One of the reasons for this, certainly, is that it will enable you to provide dentures of unparalleled esthetics. But of equal importance is the fact that it will literally make patients your fervent advocates among their friends and neighbors.

Whether or not you have attended the Dentogenic Seminars, you owe it to yourself to see this film program. Simply complete the reservation form below.

Contributions: Manuscripts should be typewritten, double spaced, and the original copy should be submitted. Every effort will be made to return unused manuscripts if request is made, but no responsibility can be accepted for failure to do so. Anonymous communications will receive no consideration whatever. Manuscript and news items of interest to the membership of the society are solicited.

Forms close on the first and fifteenth of each month. The early submission of materials will insure more consideration for publication.

**SHIP YOUR COPPER BAND ETC., or RUBBER
IMPRESSIONS, or
HARD STONE MODELS TO US**
for all types of JACKETS, GOLD INLAYS and BRIDGES

USE BUSINESS REPLY LABEL (BELOW) NO POSTAGE, NO MONEY, NO C.O.D.

You have a choice of having your ceramic and gold restorations constructed from the "Copper band impression technic," or from "Rubber base impression technic" or from your "Hard stone models." Made from your HYDROCOLLOID, ALGINATE, and SILICONE impressions. We prefer running your "Rubber impressions."

If you run your own models, we suggest you use VEL-MIX stone. Please do not place dowel pins or cut model apart; we will do that. We suggest that you fill impression with stone to about one-half inch higher than neck of teeth. This is important. Your impressions or hard stone model should include the prepared tooth or teeth with an additional two or three teeth on either side. Also, a stone model or tray impression of the opposing teeth and a shallow wafer wax bite.

We do not disassemble or duplicate your model. We keep it intact just as you send it. We ship your restoration to you on your original model. As your model is, so shall your restoration be.

We have a new and very important RUBBER BASE IMPRESSION TECHNIC. No syringe—no custom tray—no bubbles—no medicated or surgical gum retraction—no pain to patient—no injured gum tissue. A perfect impression each time. Be sure to request description of it.

Now...the facts why you should prescribe Luxene!

"Clinical Observations of Number of Fractures of Acrylic and Modified Copolymer Vinyl Dentures"*

—William F. D. Grant, D.D.S.*

D

FINDINGS OF CASES STUDIED OVER A FIVE-YEAR PERIOD

Incidence of breakage: 100 out of 695 acrylic cases (14.4%).
11 out of 695 Luxene cases (1.6%).

Six of the 11 Luxene repairs were due to tooth fracture, leaving only 7/10 of 1% of the dentures studied with base material failure.

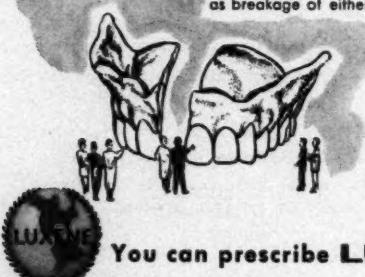

The rate of fracture of acrylic was 12 times as great as for Luxene.

ADDITIONAL STATISTICS ACQUIRED THROUGH QUESTIONNAIRES

Of 2,385 Luxene dentures made in the past four years at the dental division of the Henry Ford Hospital, only 12 required repair, yielding a breakage rate of only 0.005.

CONCLUSIONS OF THE STUDY

"From comparison of these figures it can be seen that the vinyl resin dentures as studied performed in a superior fashion insofar as breakage of either base material or teeth were concerned."

LUXENE

ANNUAL MEETING

Orville C. Larsen, Assistant Editor

The Annual Meeting of the Chicago Dental Society was held on May 16th in the Waldorf Room of the Conrad Hilton Hotel. A good crowd of members and their ladies were on hand to witness the installation of the new officers for this year, and to hear an excellent program on Denture Construction, with emphasis on esthetics and tooth arrangement, by Dr. Earl Pound of Los Angeles. Those arriving on the scene early viewed some interesting travel movies before the meeting.

President Lynch called the meeting to order, and quickly dispensing with the usual business proceeded to present plaques to the retiring Branch Presidents, Directors and Officers, congratulating them on their splendid work during the past year. Also awarded plaques were six men who have the distinction of having practiced dentistry for over a period of fifty years. President Lynch then installed the Society's new Directors: Paul H. Brown, North Side; Robert N. Price, West Suburban; Casimir J. Rogalski, Northwest Side. The installation of Vice-President Edward F. Kritzke, Secretary Gerson M. Gould, and Treasurer Robert L. Kreiner, followed. After a short farewell address in which retiring-President Lynch thanked all those who had worked with him during the year and told of the Society's accomplishments including the

many new ideas realized during the Mid-winter Meeting, he introduced our new President, Dr. O. E. Scott, and duly installed him in office. In his acceptance speech, President Scott expressed his appreciation for the honor conferred upon him, and spoke of some of the problems confronting the Society and how we are going to have to meet them. Very much a part of the proceedings was our new President-Elect, Robert F. Tuck, retiring Secretary, who will be installed as President of the Chicago Dental Society in 1962.

Once again, *FORTNIGHTLY REVIEW* Editor, Elmer Ebert, had the pleasant privilege of presenting bouquets of roses to the outgoing and incoming first ladies, Ruth Lynch and Gladys Scott. Each accepted her floral tribute most graciously.

This has been an outstanding year for our Society. All of the retiring officers, the directors, the committeemen, everyone who had anything to do with the operation of society affairs deserves a big hand for a great job. We're all proud of what Jim Lynch has accomplished with your help. Let's give the same kind of cooperation to President Scott and the new administration, and have another great year.

Enjoy a fine summer, and come on out to the meetings in the fall. We'll be looking for you.

ATTENTION, ASSISTANTS!!

The Chicago Dental Assistants Association again this year is offering dental assistants the opportunity to enroll in its Extension Study Course in preparation for examination for Certification.

The course of study has been planned by the American Dental Assistants Association Education Committee and the American Dental Assistants Certification Board working with the Council on Dental Education of the AMERICAN DENTAL ASSOCIATION to perfect an education and examination program that would be acceptable to the AMERICAN DENTAL ASSOCIATION. This acceptance and approval was given by the House of Delegates at the October 1960 meeting of the AMERICAN DENTAL ASSOCIATION.

The cost of the course is \$50.00 and covers the following subjects: ethics and jurisprudence; instruments and their use; x-ray techniques; laboratory methods and technics; office management; chairside methods and procedures; dental anatomy and terminology; pathology; bacteriology; pharmacology; nutrition; first aid, and others that make up the daily routine of the dental assistant.

Classes will start on September 6, 1961, and will be held at an easily accessible central location on Wednesday evenings until the minimum 104 hours of study are completed.

Requirements for enrollment are: membership in the Chicago Dental Assistants Association, and employment in an ethical dental office.

Installation Address of Incoming President*

Dr. O. E. Scott
1961-1962

President Lynch, fellow members, and guests:

First I want to thank you for the great honor you have bestowed on me by electing me as your president for the coming year. I am fully aware of the responsibility that comes with the office.

Like all those who have attained this position before me I have aims and aspirations, many of which I hope will be realized.

Before I mention some of our goals, I would like to pay tribute to Jim Lynch and his administration for the wonderful year they have given us. I think all agree that it has been an outstanding year, and that the Midwinter Meeting was probably the greatest we have ever had.

There are great problems facing us. There is legislation pending which, if passed, will make it possible to form service corporations to take care of large groups of people. In a large community such as ours we will definitely be affected.

There are various suggestions for pilot programs on the care of groups at different income levels. These are all major problems but I feel we can take care of them as they arise.

I believe we should expand the program for dental education at the grade and high school levels, and also the adult education program for information to the public.

I feel our most important problem concerns our relations with our own membership. We can hardly be proud of the fact that there are hundreds of members who seldom attend this meeting and are satisfied with branch meetings. There are still hundreds more who never attend a branch meeting but attend only some local meeting, and there are others who seldom, if ever, are seen at any meeting.

One of our editors received an award for an editorial on Apathy. There is no question that there is complacency, but the thing we are interested in is, why. I believe it is lack of information. We have failed to get through to these members. I expect to request the Executive Committee of each branch to meet each month with their Director to discuss the problems that are presented to the parent society. Some branches are now doing so. It has not been uncommon, when pressed for time or on a guest night, to dispense with the Directors' Report. By this procedure the branch membership shows lack of appreciation and lack of understanding of the tremendous amount of work the Director does in their behalf. This is another instance of lack of information. I believe it should be mandatory that the Director report at each meeting, as he is the sole source of information from the parent society.

In November, 1958, a questionnaire was sent to every fifth dentist in the United States. A number of questions were asked. The fourth ranking comment dealt with the Association's relationship with its members. Most of the comments were "That greater effort should be made to listen to minorities and individual members, or that the association should improve its downward communications with the members." This is exactly what we plan to do.

We also plan to have every non-member visited and invited to meetings, unless there is a known good reason for not doing so.

I have been asked what the theme would be this year. If I were to choose one I would say: Better Service to the Public and Better Information to the Members.

With an informed membership and this fine Board you have chosen, I think we can look forward to the coming year with confidence.

*Presented at the May 16th meeting of the Chicago Dental Society.

News and Announcements

PROSTHETIST (DENTURIST) BILLS DEFEATED IN COMMITTEE *but look below!*

At a hearing on Thursday, June 1st, before the License and Miscellany Committee of the House, H.B. 1484 (bill to register oral prosthodontists by the Department of Registration and Education) was defeated in committee. This was a bill to permit laboratories to deal directly with the public. By a vote of 16 to 13 the bill was voted "Do not pass." With this defeat a companion bill 1521 was also defeated. For all practical purposes the bills are dead.

Our very sincere thanks to Drs. Tuck, Osmanski, Jordan, Fitz, Esper, Donelan, Smith, Clopper and to Mr. John Porter and Mr. Ed Stephens, for their outstanding service at the hearing and for a job well done. Our grateful thanks to Mr. Barry McNulty, Executive Secretary of the Illinois Dental Laboratory Association, for his valuable help. We would also commend and thank the contact men for their excellent job of informing the members of the committee on organized dentistry's stand. Keep up the good work.

As soon as H.B. 1227 through 1233 are ready for House action, each legislative contact man will be notified by Dr. Paul Clopper and given instructions. These bills have the sponsorship of organized dentistry and are a must.—*E. Ebert.*

NEW DENTURIST BILLS INTRODUCED!

As we go to press new denturist bills just like the ones described above and defeated have been introduced in Springfield. They are House Bills 1727 and 1728 and Senate Bills 881 and 882. Once again the profession must combat the indefatigable forces that are striving to breach the Dental Practice Act and make it possible for untrained technicians to treat the unsuspecting public. All members should prepare for action.

INJUNCTION SUIT FILED IN FRANKLIN COUNTY

The Illinois State Dental Society, along with Phillip J. Kartheiser, Joseph B. Zielinski, Paul W. Clopper, Carl J. Madda and John W. Hardy, as officers and directors, and Arthur L. Lenzini and Guy W. Lambert, as individual dentists, filed suit in the Circuit Court of Franklin County on May 15, 1961 to enjoin C. R. McElwee from practicing dentistry without a license.

McElwee has been operating a dental laboratory at West Frankfort and on March 18 was found guilty in a criminal case and was fined \$1,000.00 by County Judge Webb Johnson and was placed on probation for one year.

Immediately after the trial in County Court, McElwee was indicted by the County Grand Jury on charges of subornation of perjury, this meaning that he is charged with trying to influence the testimony of witnesses who appeared against him or who were to appear against him in the criminal case.

It is expected that the injunction suit will be reached for trial some time in the early Fall of 1961.

MICHAEL REESE COMPLETES FIRST YEAR OF INTERCEPTIVE ORTHODONTIC CLINIC

July 1, 1961 will mark the close of the first year of successful operation of the Mandel Clinic interceptive orthodontic service. This clinic was inaugurated in 1960 in conjunction with a teaching course for practicing dentists to demonstrate methods of intercepting and preventing incipient malocclusions with the use of removable appliances. Dr. Max Gratzinger, for many years associated with Dr. A. Martin Schwartz of Vienna, supervised the clinic and directed the teaching.

(Continued on page 32)

Editorial

Commencement Time

From the 1st of June through the last week of this month thousands of young people will receive their diplomas in recognition of their completion of the prescribed curriculum for primary, secondary or college degrees. Each of us must know at least one of the youngsters as we serve them professionally and yet how many of this vast multitude have you or I approached on the matter of making dentistry their life work? The literature is filled with articles on the tremendous shortage of dental manpower; how, in the face of the great population growth, we are confronted with an almost impossible situation. Only when the number of dental graduates is increased can we hope to hold our own. Auxiliary help, increased efficiency, better planning, more widespread fluoridation of communal water supplies, and better dental health education can help but if we are to continue to practice dentistry at the high level we now know, more dentists is the only answer. You as the family dentist are best able to tell of the great opportunities dentistry as a profession affords.

Tell the story again and again and the writer is sure that much can be done.

May it further be recommended that each of you read the "Survey of Dentistry—Summary" for unless you are familiar with its content you cannot know what is proposed within its covers. This may be obtained from the American Council on Education, 1785 Mass. Ave., N.W., Washington 6, D.C., at \$1.00 per copy. Send for it now and study it.—*E. Ebert*.

Effie Freedlund Honored

At a recent Sunday Community Congress of the Back of the Yards Council Mrs. Effie Freedlund of our Dental Health Education Committee staff was one of six individuals honored for long and dedicated service to that community. Mayor Daley presented a citation to Mrs. Freedlund for her whole-hearted dedication and cooperation in the conduct of dental surveys for the last eleven years conducted by the Chicago Dental Society and the Back of the Yards Council. It was a well-deserved reward for her many hours of unheralded service to the youngsters of this community and for that matter to the communities throughout the City of Chicago.

On behalf of the officers and members of the Chicago Dental Society we congratulate Mrs. Freedlund for the recognition given her and add our deep appreciation for a job very well done and for her many years of loyal service. It is our hope that she will continue in this most worthy cause for many years to come.—*E. Ebert*.

Book Review

The reviewer, Dr. Byron J. May, of Chicago, is a renowned radiologist. For many years, until just recently, he was a member of the faculty of Loyola University School of Dentistry.

Radiation Protection and Dentistry:
by Arthur H. Wuehrmann, D.M.D., University of Alabama School of Dentistry.
222 pages with innumerable illustrations.
Index \$6.50. St. Louis, the C. V. Mosby Co., 1960.

This well-written volume tells us about x-radiation, how it reacts with human tissues, and how dental radiation can be decreased without interfering with present diagnostic procedures.

A well-written introductory chapter emphasizes the importance of being well informed about the many aspects and ramifications of radiation production and effects.

The author warns us that "x-ray is invisible and insidious. Only its effects may be observed, and these perhaps only years later. The dentist should know the facts

and attempt to educate his clientele whenever possible."

The contents of this text is divided into seven sections and an appendix. It is concise and well organized. The numerous illustrations and drawings are interesting and excellently reproduced.

"This book is not designed as a scientific textbook," Dr. Wuehrmann writes, "It is written solely for the use of the general practitioner, with the hope that, through the application of its contents, the practitioner may more adequately protect his patients, employees, himself, and personnel in areas adjoining his dental office."

Smooth paper and relatively large type contribute to the ease with which the book may be read. The pocket size and flexible leather binding make the reader appreciate this wealth of information.—*Byron J. May.*

C.D.S. Messages on Radio

Listen, the week of June 19, to Chicago Dental Society messages on WMAQ, 670 on your dial.

Special emphasis on the Society's post payment budget plan will be made in spot announcements to be heard on the Henry Cooke Show and other morning programming.

June 19	June 20	June 21	June 22	June 23
6:05	8:30	7:05	7:05	7:30
8:30	9:30	9:55	8:30	9:05
9:05	11:30	10:30	9:05	9:35
9:30		10:55	10:35	9:55
10:55		11:30		10:55
11:05				
11:30				

In addition, other spots will be scheduled during the Henry Cooke Show from 6 a.m. to 10 a.m. during this week.

These announcements are arranged for the CDS Public Relations Commission by our public relations counsel, The Julian J. Jackson Agency.

U. S. National Health Survey Examinations in Chicago Area

The Public Health Service's U. S. National Health Survey is visiting the Chicago Metropolitan Area for the second time during a three-week period started on June 5. About 150 representative adults from the southern part of Chicago and Cook County, Will County, Ill., and Lake County, Ind., will be given a special health examination.

In a visit to Chicago last September, the Survey examined 150 people from the northern part of the Metropolitan Area.

As in the examination program last fall, the persons to be examined will not be volunteers, but adults preselected by a probability sampling technique. In effect, the examinees are chosen at random from the whole population of the sample area, irrespective of their social, economic, or health characteristics.

The examinations are performed in the Health Survey's mobile examination centers, brought to the area and set up in two locations.

The purpose of the examinations is to collect, on a uniform basis, statistical information on certain chronic conditions, particularly cardiovascular diseases and arthritis, and on physical and physiological measurements. The health examination is conducted in a single visit. It consists of a medical history; a physical examination for certain conditions for which examination can be made in a uniform way and in a single visit, and for which diagnostic criteria exist; a dental examination; screening tests for visual acuity and hearing; a 12-lead electrocardiogram; blood pressure determinations; 6 foot-14x17 chest x-ray; x-rays for hands and feet; modified glucose tolerance test, microhematocrit determination; serologic test for syphilis; serum cholesterol level; serum bentonite flocculation test for rheumatoid arthritis; urine sugar (and albumin for males); height and weight; and a series of body measurements which are important—from the

standpoint of safety and efficiency—in the design of motor vehicles, aircraft, and farm and industrial machinery.

Designed for a particular statistical purpose, the examination differs in many respects from the kind of examination received by people seeking care from their own physician or dentist. In the dental examination, the condition of the teeth is determined on a uniform basis, and the oral hygiene status and the severity of malocclusion and periodontal disease also are assessed objectively. Neither x-rays nor a dental history are taken, and the examining dentist does not recommend any treatment.

Findings are not disclosed to examinees directly. Each individual is asked, however, if he wishes the findings supplied to his own dentist and physician; and if the examinee so authorizes, a report is sent to the physician and dentist he designates.

The examining physicians are fellows or senior residents in internal medicine working temporarily with the Public Health Service. The other team members are a dentist, nurses, x-ray technicians, and history-interviewer receptionists regularly on the PHS staff.

The Health Examination Survey is nationwide and is a major project of the U. S. National Health Survey authorized by Congress in 1956. It constitutes the first attempt in this or any other country to perform examinations on a representative sample of the national population.

The second Chicago "stand" is the fourteenth in the National sample. The data gathered in the Survey will not produce separate figures for localities or States. When all the "stands" are completed, the results will yield estimates for the United States as a whole.

Another part of the National Health Survey program—a Health Interview Survey which has been going on since

REGULAR MONTHLY MEETING CHICAGO DENTAL SOCIETY

Conrad Hilton Hotel
May 16, 1961

President James N. Lynch opened the meeting at 8:12 p.m. in the Waldorf Room of the Conrad Hilton Hotel.

A motion was made and carried to dispense with the reading of the minutes of the April meeting. A motion to approve the minutes of the April meeting as published in the May 15th issue of the *Fortnightly Review* was carried.

Reports of standing committees—none.

Reports of special committees—none.

Unfinished business—none.

New business:

President Lynch asked the Secretary to read the following Resolution:

"RESOLVED that Article XIII Sec. 2 be amended by adding the following standing committees the number of personnel to be as indicated:

Insurance (11)

Dental Budget Plan (11)

Civil Defense (11)

Be it further RESOLVED that membership of the Insurance Committee, the Dental Budget Plan Committee and the Civil Defense Committee shall consist of the chairmen of the committees of the same name in each of the eight branch societies plus three members appointed by the Board of Directors beginning with one, two and three year terms, their successors to be appointed for three-year terms and provided that no two such appointees shall be members of the same branch society. The president shall annually designate the chairman of these committees. The president-elect shall annually designate the vice-chairmen of these committees."

A motion was made, seconded and carried to adopt this Resolution.

Dr. Lynch then presented Drs. P. J. Kartheiser and Paul W. Clopper, President and Secretary of the Illinois State Dental Society. Presentation of 50-year pins and certificates was made by Drs.

Kartheiser and Clopper to the following members: Arthur M. Bean, Harold R. H. Brevig, Charles Hainz, George H. Mann, Herbert G. Price, Henry R. Seal, Dana L. Woodworth and Jacob S. Zipperman.

Dr. Lynch next presented the following retiring branch presidents with certificates of appreciation: Englewood, Robert J. Tharp; Kenwood-Hyde Park, Arthur J. Block; North Side, Stanley S. Goldberg; North Suburban, Axel L. Pedersen; Northwest Side, Theodore J. Serr; South Suburban, Myron W. Bardige; West Side, Walter F. Zipprich; West Suburban, Joseph T. Brophy.

The retiring officers and directors of the Society were then called to the rostrum where Dr. Lynch presented each with a plaque in recognition of their services: O. E. Scott, President-Elect; Rudolph U. Grieff, Vice-President; Robert F. Tuck, Secretary; Paul Kanchier, Treasurer; Arthur M. Duxler, Director from North Side; Edward F. Kritzke, Director from West Suburban; Joseph C. Ulis, Director from Northwest Side.

Following this the new officers were presented and installed: Robert L. Kreiner, Treasurer; Gerson M. Gould, Secretary; Edward F. Kritzke, Vice-President; and O. E. Scott, President. Dr. Lynch then presented Dr. Tuck and stated he would be installed as President in May of 1962.

Dr. Lynch then introduced the following new directors: Paul H. Brown, North Side; Robert N. Price, West Suburban; and Casimir J. Rogalski, Northwest Side.

Dr. Scott then made his acceptance speech and among other things he outlined some of his plans for the coming year. He expressed the hope that each

(Continued on page 31)

News of the Branches

Englewood

Some of our boys are so efficient in their offices that they can take time to attend state dental society meetings downstate in Peoria. Representing Englewood at the Illinois State Dental Society bowling tournament were Unger, Serr, Mathews and Davido. They played a good game but the other branches had more experience, need more be said? Also seen at the meeting were Straub and Starshak. Roman Urban and Lew Weil presented table clinics at the meeting. . . . Paul and Mrs. Kanchier departed on June 2nd for Winnipeg, Sask. to visit Paul's mother and to celebrate her 80th birthday. Paul is driving and looking forward to enjoying the spring scenery through Wisconsin and on through Dubuque and St. Paul. . . . Our Englewood friend and former Illinois State Dental Society president, Werner Gresens, is seriously ill at the Garfield Park hospital since early in May. I am sure a note of cheer from the boys would be appreciated. . . . After several years' illness with occasional stints of practice, Tom Rooney succumbed and was laid to rest May 31st. . . . William O'Brien is going West. His new office will be on the same street, 79th, but in the vicinity of Western Ave. . . . Lawrence Lucas reports that Ernie Goldhorn and Emil Olivi, who had offices in the same building, were completely put out of practice when fire destroyed the building. They are now looking for a new place in which to work. . . . Ed Tharp's book learnin' will stand him in good stead when he attempts to keep score for the Little League. His two youngest sons are playing. . . . Dapper Chuck Sinard is sporting a new white convertible Cadillac around town these days. . . . Ted Vermeulen and Ray Van Dam traveled to Washington to attend a power-packed seminar. . . . Ed Werre is in the dumps and who wouldn't be if their boy had a detached

retina of the eye. The boy is having a third serious operation on June 3rd. May it be a successful one this time. . . . Bill Shippee is preparing to go to Florida to visit his boy, a successful D.D.S. . . . Val Siedlinski has been made president of Archer-Brighton Park community conservation council. Also as proxy of the Parkview Savings and Loan Association he is looking for new investment accounts. . . . That is all for now and do not forget Wednesday, June 21, at the Glendale country club.—*Julius J. Dziubak, Assistant Branch Correspondent.*

North Side

Now that the summer has OFFICIALLY started with the wonderful North Side Branch Golf Outing on June 14, we would like to thank Herb Blum and his entire Sports Committee for a job well done. . . . Our President, Bill Semiloff, and his entire Board of Directors have had many meetings planning new exciting activities for our Branch. A new meeting place, with excellent food (even the possibility of a *special* hot buffet dinner) and plenty of free parking space is in the arrangement stage. Watch for further announcements. . . . We would like to take this opportunity of thanking our new CDS Director, Paul Brown, for the superb job he did last year as the Branch Correspondent. We are all looking forward to the same type of continued interest and activity by Paul in the welfare of *all* of Chicago dentistry now that he is representing us on the CDS Board. . . . Art Duxler is continuing to serve dentistry as the new CDS Monthly Program Chairman. Let's all give him our full support and plan to attend every downtown meeting as well as our local North Side Branch affairs. . . . Our next column will be written by our President, Bill Semiloff, and will pre-

sent to the Branch the stimulating programs, projects and plans for the coming year as already developed by the Board of Directors and the various committees. Your support of these activities by attending all the future planned program meetings certainly is the only sincere way of encouraging these men to continue working for your benefit. After reading the next column, call Bill and let him know of your interest and support (or *constructive criticism!*) . . . The Temporo-Mandibular Joint survey being developed by the Uptown Dental Forum is getting up steam. Each participating dentist is to survey his teen-age patients for TM Joint disturbances (clicking, jumping, soreness, etc.) and then ascertain the amount and time of gum-chewing by each patient each day. A check-off survey chart is being prepared and will probably be available this month. Any member interested in learning more about this problem or in participating in the survey can contact Earl Elman, AM 2-4242, and obtain the charts and information. . . . The Editorial Committee this year is to be a *working group*. Each member of the Committee will collect information and alternate with the regular correspondent in writing one of the two North Side columns each month. This will provide the Branch with a greater diversity of information and interest and varying means of presentation. These men have volunteered to write articles: July, Joe W. Gordon; Aug., Paul Brown; Sept., Jules Barrash; Oct., Stanley Goldberg; Nov., Harry Greene; Dec., Richard Pipia; Jan. 1962, Herb Krummel; Feb., Stan Buckner; March, Rube Kadens; April, Joe L. Gordon. Contact any of them with information about your associates or yourself as we are always interested in the welfare and activities of all our dental friends. . . . As an example, Dr. R. E. Hoskins has been getting up in the world. He has moved into a newly-remodeled office on the 36th floor of the Pittsfield Building. We wonder if he is developing a new technique for dentistry in space, being that high. Any of you fellows who can stand the altitude should

stop in and watch a few satellites pass by. . . . Ted Dubrow took an extended trip to the Illinois State Society meeting in Peoria and returned via New York City where he had a wonderful time visiting friends and seeing shows. . . . Our congratulations to the Ernie Berlant family on the marriage of their son Floyd on May 28. . . . We wish Emanuel Frazin much good luck in his new office on Lincoln near Peterson. For a while he will be spending part time at his old stand in the Uptown Bank Bldg. . . . Marv Treiber is now spending two days a week in Paul Krolik's office downtown. . . . We mourn the recent passing of Arnold Liesemer, 4753 N. Broadway, and extend our sincere sympathy to his family. . . . Participating in Society activities and meetings is an obligation of every good member. So let this not be THE END but only THE BEGINNING of a new year of renewed activity by all of us.—*Earl S. Elman, Branch Correspondent.*

West Suburban

Greetings from your frustrated correspondent. One of these days I'm going to take some golf lessons, and then watch out. As you might surmise, I didn't play too well at our annual outing at Nordic Hills. But that is past history and we shall all be pointing to next year's affair. To recap some of the action of May 17th, Bob Sullivan took low gross honors for a member with a stellar 74, while low gross honors for a guest was captured by Bud Adams with a 75. Congratulations, men. Tope Maxson didn't score too well but he won a handsome transistor radio set on the raffle. Dom Catrambone won the outstanding door prize of matched luggage. (He has me to thank for that because I sold him one of the first tickets). The rest of us dubbers had to scramble for prizes based on the Peoria system. There should have been some type of award for the best-dressed golfer; Bob Juel would have won "going away." Those were mighty flashy trousers he was

wearing. Though the weather wasn't too bad until very late in the afternoon, I think many of the men were praying for an early rain so that they could get down to some serious card playing. This statement is based on the action in the card room prior to dinner. Sorry we had to break it up for food. All in all, the golf outing was quite successful with approximately 80 men making the rounds and 60 men remaining for dinner. The members of the committee were happy to see so many of our laboratory friends in attendance, also. . . . One sad note was interjected that same evening when Joe Brophy announced the recent passing of one of our honored and most active members, Jack Opdahl. Many members dropped in to pay their final respects to Jack that very evening. . . . Ev Walters is back in harness, working shorter hours. Isn't it strange that one never realizes how much he is overworking until he suffers a set-back in health. Let this be an object lesson to us all. At any rate, Ev looks and feels fine. . . . Latest family additions are twins to Nick and Mrs. Choukas. What a man! The cigar smokers are looking for the handouts. . . . The vacationers are starting early. George Welk, Sr. went muskie fishing in upper Wisconsin on May 28th. And if I'm not mistaken, Joe Restarski did the same over the Memorial weekend. Hope you boys did well. . . . At the Oak Leaf Study Club meeting of May 19th, Bob McDonald showed an interesting tape film on "GI Defections while Korean Prisoners." Bob reported that brain washing on the part of the Commies was very effective. . . . Congratulations are in order for two West Suburban members who were recently named as chairmen to newly-created faculty positions at Loyola Dental School. The men and their positions are Nick Choukas, Director of Clinical Graduate Training; and Frank Lucatorto, Chairman of Clinical Oral Diagnosis. Take a bow, men. . . . The annual Monte Carlo Night was held on May 23rd at Woodridge Country Club. All reports have it that a very excellent buffet dinner was served, and that there were many

fine door prizes. Naturally, there were many games of chance which provided the evening's entertainment. Grapevine has it that much money traded hands, and one of the big "investors" of the evening was Bill Figg. Who needs Las Vegas? . . . Seen on the evening of May 27th, entertaining his wife on her birthday was John O'Connell. That's a good boy, John. Hope you found a place to eat dinner. . . . Joe Cantafio tells me that the annual Arcolian Golf Outing will be held at Glendale on Wednesday, June 28th. All are welcome. . . . Well, that does it for this issue. Be sure to let me know of any news out your way so that we can pass the word to our friends. . . . As we go to press we are advised of the death on May 31st of Mrs. Ada Robeson (wife of Foster). Our sincere sympathy is extended to Dr. Robeson and other members of the family.—*William R. Aquilino, Correspondent.*

Northwest Side

As I have been your branch correspondent for two of the past three years it is with some mixed emotion that I must inform the branch membership that the duties of branch correspondent now pass on to Joe Cantafio who is succeeding me. I have thoroughly enjoyed being your representative as it has brought me much closer in contact with our many fine members. There have been times when getting out the column was a bit of a task but isn't anything worthwhile a little effort? I am sure that Joe Cantafio will be most eager to serve the membership as he has done in the past. So, to all those that have news items to contribute to this column, please contact Jos. A. Cantafio whose phone number is AN 3-3235 and mail those news items to his office address at 55 E. Washington Blvd. . . . Best wishes and congratulations to Gerson M. Gould upon his installation as Secretary of the Chicago Dental Society for the coming year. Gerson has always been a staunch supporter of our branch and a front-runner in everything that is concerned

Manhattan extends congratulations to the graduating classes of Illinois, Loyola and Northwestern here in Chicago . . . and Marquette in neighboring Milwaukee. Soon you will be taking the "State Board" and entering practice. Perhaps you know that Manhattan maintains offices in the Pittsfield Building and at 509 South Wabash Avenue where you may see our complete line of professional gowns . . . ready-made and tailored to measure. Plan to drop in and try on the gowns that help you look better, feel better, and work better. They're available in your favorite styles, fabrics and colors and at little cost indeed. You'll be most welcome . . . If you'd like a copy of our latest catalog, we'll gladly send it by return mail. . . .

"QUALITY" "SERVICE"

with dentistry. . . . August Giraldi returned from Winnipeg, Canada, where he attended a surgeons' convention there some weeks ago and I am sure that this trip was enjoyable as well as educational. . . . Another one of our wandering members is Max Bramer who recently returned from Peoria, Illinois, where he gave a table clinic at the State meeting. The subject of his clinic was "Lateral Headplates in a New X-ray Technique." Also on June 5th thru June 10th he took a postgraduate course at Columbia University on the subject of children's dentistry. . . . Mark and Mrs. Spencer have taken another long weekend to visit relatives in Iowa over the Memorial Day holiday. . . . As for myself, my wife Rose and I recently returned from a fishing trip to Wisconsin where Rose caught her first northern pike and was she excited and I believe she enjoys these trips more than I do. . . . I hear that David Pokrass recently underwent surgery and at present is recuperating at home. Also, Joe Gillmeister is on the sick list. We certainly hope that David and Joe will soon be back with us on the active list. . . . Our new Director for the Chicago Dental Society from the Northwest Side branch is Casimir J. Rogalski who succeeds Joe Ulis. We all know Cas as a very active member as he has served on many Chicago Dental Society committees. . . . With the summer season upon us the news items will be scarce because many of our members will be away for summer jaunts, however, might I again remind the membership to forward all news items to our new branch correspondent, Joe Cantafio, who will certainly appreciate a little assistance in making the column a success. Thanks to all.—Chester L. Jasick, Branch Correspondent.

Kenwood-Hyde Park

News of the footloose—Dave Handler just returned from New York, Bob Pinkerton from Arkansas, Jesse Carlton from Florida and Howard Shepard from

the Caribbean. In March, Walt Dundon, as a member of the Accrediting Committee of the Council of Dental Education, visited the College of Physicians and Surgeons of the University of West Virginia, a beautiful medical center, including the College of Dentistry, built, now get this, fellows, on income from a tax ON SOFT DRINKS! . . . Ed Kozak is on the move, too. What with conducting a busy practice, teaching at Northwestern University, and his wife Phyllis' gall bladder operation, Ed is running around in circles. He says that he isn't getting anywhere, but he sure is covering distance. . . . Warren Lutton almost left this world for an undetermined destination while painting the gutters on his roof. After landing on good old terra firma he found his wife gazing at his life insurance policy with rapt attention. The gutters are corroding, but Warren just doesn't care any more. . . . Ben Gans' brother Alex, a practitioner in California, is visiting Ben in Chicago, and the boys are busy painting the town, excuse the expression, red. . . . D'ja know that Clint Fisher's daughter, Janet, won the City Championship in ice skating, solos, and was presented with a trophy at the Ice Capades? . . . Howard Harvey's daughter, Barbara, is recovering nicely from her second operation for the correction of an eye defect. Howard's wife, Rita, takes care of their six children all by herself because, Howie says, she likes it that way. Hats off to you, Rita, and on second thought, to you, too, Howie. . . . Get your dark glasses out. Jim Estaver is wearing a vest that is absolutely blinding. . . . Franklin Otto saw a sign that tickled his dry sense of humor, in a cleaning establishment, that read "DYE RIGHT!" . . . Get Art Block to tell you his story of the wandering pencil. . . . That May Meeting, that EXTRAVAGANZA OF 1961, that combined Ladies' Night, installation of officers and Clinic Night was, in the parlance, a "gasser." We all had a real soiree and a great time. Keep your eyes peeled for the May Extravaganza Night of '62!—*Vic Wittert, Branch Correspondent.*

Crescent Pellets

bring you ALL of the advantages you are accustomed to in filings plus the fact that they help to speed up the amalgam procedure, conserve chairtime and avoid waste . . .

You have a choice: Cresilver Pellets, "the King of dental alloys," that contains the highest practical silver content (74½%) of any available today; or Silverloy Pellets, "the favorite silvery white amalgam alloy."

Formula for better fillings: 2 pellets of Cresilver or Silverloy. 2 twists of the Crescent Mercury Dispensor. 12 seconds mix on the Wig-i-bug.

Remember you get a FREE Crescent Mercury Dispensor (designed especially for use with pellets) with every 10 ozs of Cresilver Pellets @ \$24.25, or 10 ozs of Silverloy Pellets @ \$20.75. Call your dealer today.

MINUTES

(Continued from page 18)

branch board of directors would meet monthly to discuss current problems and report to the body. Dr. Scott also stated he hoped to reactivate the Membership Committee in an effort to bring new members into the Society.

Dr. Scott then presented a plaque to Dr. Lynch, the retiring President, and expressed his thanks and appreciation.

At this time Dr. Ebert was called to the rostrum and he presented a bouquet of red roses to Mrs. Lynch and Mrs. Scott.

Dr. Lynch presented Dr. Graham Davies, Chairman of the Monthly Meeting Program Committee. Dr. Davies introduced Dr. Earl Pound of Los Angeles, the essayist of the evening, who presented a lecture on Denture Construction.

Approximately 400 members and guests were present. The meeting adjourned at 10:10 p.m.

Respectfully submitted,

Robert F. Tuck, Secretary

HEALTH SURVEY EXAMINATIONS

(Continued from page 15)

July 1957—has already produced reports on topics which can be investigated appropriately by this technique. Among the topics published so far are physician visits, dental care, disability, persons injured, acute illnesses, hospitalization, impairments, and broad groupings of chronic conditions.

NEWS AND ANNOUNCEMENTS

(Continued from page 12)

The rewarding results of the clinic and the satisfaction expressed by the participating dentists caused the administration to continue the clinic and also to again make the course available to dentists engaged in the general practice of dentistry.

Dentists interested in participating in this unusual and exceptional learning experience should write to the Dental Department, Michael Reese Hospital and Medical Center, 29th and Ellis Avenue, Chicago 16, Illinois.

NATIONAL DENTAL LABORATORY WEEK TO BE HELD IN SEPTEMBER

September 24-30 has been designated as National Dental Laboratory Week. This announcement was made following approval by the executive council of the National Association of Dental Laboratories. For the first time the nation's dental laboratories, which play an important part on the dental health team, plan to call attention to this work.

National Dental Laboratory Week plans call for holding open house in dental laboratories from coast to coast. It will come just before the Annual Meeting of NADL in Chicago, October 3-7, when the 10th anniversary of the Association will be observed.

U. OF ILL. TO HOLD COMMENCEMENT AT McCORMICK PLACE

The new 35-million-dollar McCormick Place exhibition hall was the setting for another "first" Friday, June 9, at 10:00 a.m. when University of Illinois con-

firmed degrees upon approximately 430 graduate of the Chicago Professional Colleges. This was the first time that commencement exercises by any college or university were held in the multi-million dollar exhibition hall theater.

Degrees were awarded to students in medicine, dentistry, pharmacy, nursing, the graduate college and occupational therapy by Dr. David D. Henry, president of the university.

The commencement address was delivered by Dr. Seymour J. Kreshover, associate director of the Department of Health, Education and Welfare's National Institute of Dental Research.

1962 MIDWINTER MEETING

The 97th Midwinter Meeting of the Chicago Dental Society will take place February 18, 19, 20, and 21, 1962, at the Conrad Hilton.

UNIVERSITY OF ILLINOIS OFFERS PG COURSE IN HISTOPHYSIOLOGY IN JUNE

The University of Illinois College of Dentistry will offer a postgraduate course titled "Current Histophysiology for the General Practitioner," June 26-27.

The course is designed to give the general practitioner a refresher program in histophysiology, so that terminology and the latest concepts in current literature will be clarified in relation to their application to his daily practice. Lectures, slides, microscope analysis and current articles in dental journals will be utilized during the two-day program.

Applications are available at the Division of Postgraduate Education, University of Illinois College of Dentistry, 808 S. Wood St., Chicago 12.

NOW—from COOK-WAITE

UNSURPASSED ANESTHESIA TO SUIT THE PROCEDURE

CARBOCAINE[®] HCl 2%

Brand of mepivacaine HCl

with NEO-COBEEFRIN 1:20,000

Brand of levo-norepinephrine

FOR LONGER LASTING ANESTHESIA in

- oral and periodontal surgery
- quadrant dentistry
- pulp canal work

Millions of injections in private dental practice as well as large scale clinical trials have proven the margin of safety and effectiveness of CARBOCAINE HCl.

The established 2% solution with NEO-COBEEFRIN has demonstrated a wide margin of safety and is well tolerated as an oral local anesthetic. Very rapid onset produces deep, penetrating anesthesia of long duration. In both infiltration and regional anesthesia, there has been practically no evidence of failure.

CARBOCAINE with vasoconstrictor provides other advantages including ready diffusion into hard and soft tissues for control of pain.

It is particularly indicated in periodontal surgery when some degree of hemostasis is desired to produce a dry field. Because of its distinctive molecule, CARBOCAINE does not provoke allergic responses in patients sensitized to procaine.

CARBOCAINE[®] HCl 3%

Brand of mepivacaine HCl

without vasoconstrictor

FOR SHORTER ACTING ANESTHESIA in

- those restorative procedures which high-speed techniques have shortened so dramatically
- simple extractions
- children's dentistry

One of the major advantages of new CARBOCAINE 3% without vasoconstrictor is that it produces deep anesthesia of relatively short duration by virtue of its own distinct constricting ability. It reduces soft tissue anesthesia by as much as one hour, a distinct advantage today in children's dentistry and in restorative procedures.

This new formulation is possible because CARBOCAINE is unique among dental anesthetics in that it consistently produces satisfactory anesthesia without the need of a potentiating vasoconstrictor. CARBOCAINE 3% without a vasoconstrictor has proven well tolerated. It achieves shorter duration anesthesia but is equally as effective as CARBOCAINE 2% with NEO-COBEEFRIN, and produces significantly fast onset of anesthesia.

In simple extractions, CARBOCAINE 3% avoids the potential hazard of delayed hemorrhage and aids in the prevention of alveolitis since natural bleeding ensues immediately. It is also valuable in periodontal scaling where normal bleeding is desired.

SUCCESSFUL PRACTICES NEED BOTH!

CARBOCAINE AND NEO-COBEEFRIN ARE THE TRADEMARKS (REG. U. S. PAT. OFF.) OF STERLING DERM INC.

*How it was
accomplished . . .*

Neat, clean, sharp and healthy.

These are priceless assets and this patient's dentist faced up to the "Magnificent Challenge" of personality preservation by simply preparing two broken down centrals for vacuum fired porcelain jacket crowns.

As always it is how it is done that makes the difference between an average passable result in Dentistry or a creation of perfection.

Through practice and with modern equipment dentists are now able to make, as daily routine, neat porcelain jacket crown preparations such as shown here.

We here at Kramer's have developed our skills and equipment also so we can match the fine work of the dentist and this does make possible those priceless dental restorations your patients hope to get.
